

VIDEO VBOX PRO

Video VBOX Pro combines a powerful GPS data logger with a high quality multi-camera video recorder and real-time graphics engine.

Multi Camera Recording

Taking up to four waterproof cameras and combining them with a customisable graphical overlay, **Video VBOX Pro** streams video onto a flash card or USB stick as a DVD quality MPEG-4file.

High Accuracy Data Acquisition

A choice of either 10Hz or 20Hz GPS engines provides parameters such as circuit position, lap timing, speed (accurate to $\pm 0.1\text{km/h}$), and acceleration. The optional 32-channel CAN interface retrieves vehicle data such as throttle angle, RPM, and brake pressure.

Suitable for many applications

The rugged portability and functionality of **Video VBOX Pro** means that it's ideal for a variety of applications from automotive testing, to motorsport, driver training, and industrial applications. Whether you need a system for race recording and analysis, or for development and verification of Advanced Driver Assistance systems – **Video VBOX Pro** offers a new dimension to data logging.

Intuitive Software

The setup software supplied with the system allows you to choose standard dashboard styles and maps or customise your

own. The **Performance Tools** software provides an intuitive way to analyse the data recorded by the system alongside the video.

Using **Video VBOX Pro** is quick and easy. Simply connect the cameras and the GPS antenna, insert the SD card or USB stick, and go.
